Igor Borisenko

Senior Full-stack Developer (Angular | React | Node.js | NestJS)

ghostmania2@gmail.com +995 591003867 Batumi, Georgia

https://www.linkedin.com/in/igor-borisenko-71bb50367

Summary

Senior Full-stack Developer with 8+ years of experience specialising in the Angular, React, Node.js, NestJS and Firebase ecosystem. Proven ability to build and scale applications from concept to production, demonstrated by leading the development of a wedding planning platform for 7 years. Architected and delivered a performant, component-based frontend that improved data loading times by 40% and supported long-term feature growth.

Technical skills

Angular | React | TypeScript | Node.js | JavaScript | Firebase | Firestore | RxJS | REST APIs | HTML/CSS | SCSS | Ionic | Git | Docker | Cypress | Jest | NestJS | MongoDB | NoSQL

Education

Southern Federal University 2010 – 2016

Master of Computer Applications

Experience

Hochzeit.click - DE-region B2C platform for wedding planning services Aug 2019 – Aug 2026

Full-stack Developer

https://my.hochzeit.click

Stack: Angular/Firebase

- Led the end-to-end development of the platform from initial concept to a production application having 500+ daily active users, using Angular, Node.js, and Firebase.
- Architected and implemented a scalable frontend with 50+ reusable UI components, which reduced development time for new features by 30%.
- Engineered a secure authentication and data management system using Firebase Authentication and Firestore, ensuring data integrity for all user interactions.
- Optimized application performance by refactoring data-loading patterns and implementing lazy loading, cutting initial page load time from 4 seconds to 1.5 seconds.
- Designed and built a core booking feature with Node.js, processing over 500+ transactions and integrating with third-party payment APIs.
- Established a robust bug-fixing and CI/CD process, enabling weekly deployments with high confidence.

Parametric LLC Jan 2018 – Aug 2019

React Frontend Developer

Projects:

Parametric Marketplace — https://parametric.one/

Stack: React, Laravel, PostgreSQL, Docker

- Developed and shipped 10+ core features for a public-facing marketplace using React, and REST APIs, contributing to the platform's initial launch.
- Refactored the application's state management by centralising logic in shared services, which simplified data flow and reduced bugs related to state inconsistency by 50%.
- Led the creation of a shared component library that was adopted by two separate project teams, standardising the UI and speeding up development cycles.

Pyjam — https://pyjam.com/

Stack: React, Laravel, PostgreSQL, Docker

- Built a mobile-first UI for the Pyjam social app using Ionic and React, resulting in a 4.5-star rating on the app store for its intuitive navigation.

- Developed mobile-oriented UI using React and Ionic.
- Designed application architecture and reusable UI components.
- Improved UX, navigation, and application stability.
- Maintained and stabilised existing functionality.

IDEA Advertising Agency May 2017 – Dec 2017

Frontend Developer (Wordpress)

- Executed a technical SEO overhaul by implementing structured data and optimizing asset loading, contributing to a 30% increase in organic search traffic.
- Rebuilt the mobile experience for three client websites, leading to improved Lighthouse performance scores and better cross-browser compatibility.

Wild Food Jan 2017 – May 2017

MEAN Stack Developer

Stack: MongoDB,AngularJS,Express, NodeJS

- Led the migration of a legacy AngularJS application to Angular 6, modernizing the codebase and enabling the use of a modern CI/CD pipeline.
- Achieved a 40% improvement in load speed by implementing code-splitting and optimizing the image delivery pipeline.
